ABOUT ME

Passionate software developer with 6 years of experience specialized in frontend web development. Expert in creating efficient and scalable web solutions using technologies like Angular and React. I have collaborated with leaders in the financial and healthcare sectors, contributing to digital transformation through innovative applications that optimize processes and enhance user experience.

SKILLS

Programming languages
- TypeScript, JavaScript, Java

Frameworks & Libraries
- Frontend: Angular, React, Next.js
- Backend: Node.js, NestJS, Spring Boot

Testing
- Unit: Jest
- E2E: Playwright

Cloud & DevOps
- Aws, Azure

Languages
- Inglés: (B1-B2)

WORK EXPERIENCE

2021 - CURRENT | SOFTWARE ENGINEER | IAS SOFTWARE S.A.S

I have worked in multidisciplinary teams and on various technology projects based on Angular and Java for the backend, React and Nextjs both for Bancolombia and Seguros Bolivar as well as in Outsourcing, performing functions and activities related to the software development lifecycle, designing automated testing strategies using Playwright, unit testing with Jest, clean architecture, solid design patterns, Redux, observables, applying agile methodologies like Scrum to meet the proposed company objectives.

2019 - 2021 | FRONTEND DEVELOPER | SALUD INTEGRAL S.A.S

My responsibilities as a frontend developer include managing and developing information systems, providing support for implemented technological tools, and designing strategies that enable process automation within the company.

2018 - 2019 | SOFTWARE DEVELOPER | CERCAFE S.A

As a software development, I performed roles within the company related to support and maintenance of information systems, as well as participation in design, development, and implementation processes of technological solutions that enable technology adoption in the company.

EDUCATION
